Dear Sir/Madam, colleges, friends,

It is my great honor to present before you prospect of the novel project from IADS Standing Committee on Research and Education (SCORE) and Polish Association of Dental Students – Dental Scientific Days.

The reason of this congress is rather simple, let us gather together and present our scientific work. We are all aware, that some students cannot afford coming to our meetings throughout the year, this was our reasoning for creating special event just for young scientists (students, interns and young doctors).

During Scientific Days you will have an opportunity to present your lecture at the Lecture Contest and your clinical case, study or a review in form of a poster at a Poster Show, while being judged by Scientific Committee from Poland and United States.

You will have an opportunity to see your friends from all over the world and expand your horizons and most of all dive into the scientific atmosphere and evolve.

We all hope that this event will become a tradition and each year we will gather somewhere in the world spreading the scientific spirit among others.

Remember, that together is better, but there's always something more than this – it is how we will all be remembered.

I, myself can't wait to see you all in Poznań and cordially invite you to join this event!

Regards,

Magdalena Wilczak
